The combat in Bloodborne is dark and full of sounds, with a variety of weapons, traps and items on offer to use. You explore the game in first-person view, using the X-Y pad to control the camera. There's no cover system, but there are several angles that add to the authenticity of combat. You can see and interact with your surroundings, making combat more authentic than in many action games. You move through the world in real-time, so you're never waiting for a loading screen or a pause for a slow animation. As you fight, it's possible to switch between weapons and get a close-up look at your surroundings, meaning you'll always be aware of your surroundings and enemies.

## **What's new in Re-Legion - Digital\_Soundtrack\_:**

**Serie Re-Legion - Digital Soundtrack Series Theme Air By Nesuveitur - Danse Macabre Polish Soundtrack By Renkoo Entertainment The main character (or npc) is the most important factor to define the chosen Lo-fi audio graphic, there are great effort to create the main character VO, design, graphics and in-game video footage as well. Choose a version that has more voices or horns and keep in mind that is the available bandwidth. As the Lo-fi genre can barely survive in the current audio market, it is very important to know that the amount of voices and changes of video elements doesn't bring enough to the audio style to be well accepted. If you are looking for a commercial track, this track is perfect to be the main title track and fit for any type of advert, commercial, anime etc. Somewhere in the infared, a star was born. Out of darkness... a child of mystery. A series that I have been overseeing from the ground up. Working with the designers and illustrators. From having our own exclusive anime made, Atelier (Nesuveitur - Danse Macabre) to designing and voicing the character. I worked with the designer Ren K Sato, voiced our that mastermind, the designer Shu Denshi has worked with us on graphic design from the beginning, the illustrator Miyako Sato has worked on multiple art pieces and the last illustrator is Wataru Shinkai, we will be releasing a artbook (Working Artwork Vol1) for the series! The theme song for the series is ANIMATION JAZZ - "There are no limits to your imagination" Involving the music to make the story and mood was an important factor in this game and anime series. When we mapped the visuals and sound, I decided to make it more of a western, jazz-flavoured Lo-Fi anime style. The music was composed by An Orchestra of my own creation, it was launched on itch.io and rpg.io in 2017 The whole theme song was crafted from notes written on reoccurring themes of hope and life in the anime. I also worked out ways to incorporate synth audio into the sequencing of the theme music, to make it feel more authentic, with both a deeper**
